Dear Mr. Yalden:

Re: Environmental Sensitivity

I am a member of the Allergy and Environmental Health Association of Canada.

It has recently come to my attention that you have been first and foremost in recent times in the fight to get Health and Welfare to recognize environmental sensitivity as an illness that should be recognized for compensation purposes.

My personal thank for this continuing assistance.

My colleagues and I feel that the battle is almost won.

We urge you to keep up the fight.

Again, many thanks for your very considerable assistance in assisting those unfortunate persons suffering from exquisite sensitivities to our badly degraded environment.

Yours sincerely

"James A. McCulloch"

JAMES A. McCULLOCH
